CyberBOT : Ingeniería Social - Descargas Maliciosas

Menú | Recursos | Salir

Durante esta capacitación, su misión es ayudar a detener los ataques de CyberBOT. CyberBOT es una red de máquinas infectadas que la amenaza de un pirata informático que infecta y toma control de una computadora. Los piratas informáticos reúnen computadoras infectadas y luego las unen en "redes BOT" que son redes potentes y malintencionadas que pueden robar su información e identidad. ¿Está listo para comenzar su misión? Comencemos.

Desactualizado vs. Actualizado

Uno de estos dos lectores de PDF es vulnerable a un ataque. ¿Cuál es?

Última actualización 6 meses atrás      Última actualización ayer

Vulnerable?      Vulnerable?

¡Correcto!

¡Un software desactualizado es vulnerable a cientos de ataques diferentes!

Departamento de asistencia técnica

Su departamento de TI le proporcionará las actualizaciones del sistema operativo y del antivirus automáticamente. Si el sistema le indica que debe instalar actualizaciones, no lo posponga. Detienen amenazas muy reales.
